

# Unlocking the Power of IIQ Testing Framework

Welcome to the future of SailPoint IdentityIQ development, where precision meets efficiency with the IIQ Test Framework (ITF).

Developed by SailPoint experts, ITF is an innovative tool designed to reshape the way your teams approach development and testing within the SailPoint IdentityIQ ecosystem.

In the ever-evolving context of Identity and Access Management (IAM), where security and reliability are paramount, ITF emerges as a unique solution. The ability to streamline and optimize the development lifecycle makes SailPoint IdentityIQ development not only robust, but also developed efficiently.

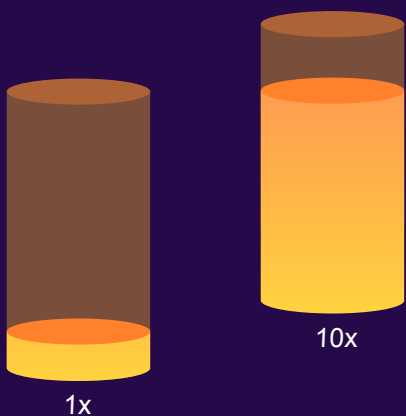

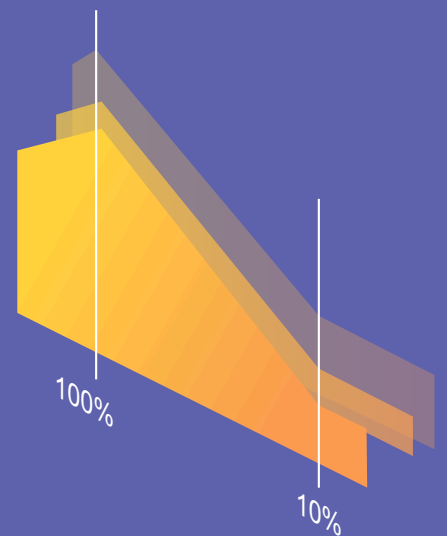

## Streamlined Development

Achieve **50% Savings** on testing effort during development

## Enhanced Reliability

Experience **90% Savings** savings on regression tests

## Increased Coverage

Run more **10x more test cases** for comprehensive testing

As organizations strive for excellence in IAM, ITF offers developers a dedicated solution for testing SailPoint IdentityIQ developments. ITF is poised to change the way you approach and execute testing processes.

## Ready to revolutionize your SailPoint IdentityIQ development?

Explore the game-changing IIQ Testing Framework. Streamline processes, save on testing efforts, and elevate reliability. Don't miss out—visit today at [www.amidentity.com](http://www.amidentity.com)
